REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: prior art does not disclose a seed port for use with a bird feeder wherein the seed port is convertible to accommodate seeds of various sizes comprising a carriage member insertable through an opening in the reservoir and having an attachment means extending into the interior of the reservoir and having a framing flange defining an opening in the carriage such that the framing flange is larger than the opening in the reservoir to limit full insertion of the carriage; a baffle guide attached to the framing flange and positioned above and within the opening in the carriage member; a baffle insertable within the guide having a shoulder positioned to impact the framing flange to prevent the full insertion of the baffle into the carriage member and a disk member conforming to the size and shape of the framing flange having a generally centered aperture to permit access to only same seeds. The disk fitting within the framing flange only in the absence of the baffle, the two cannot be used concurrently. Prior art does disclose the presence of baffles to direct the flow of seeds or protect the seeds from weather and prior art does show instances where access to seeds is restricted due to the size of the opening but there are no occurrences of both a baffle and a size restrictive device being used in the same insertable area consecutively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
